SUMMARY

Full Stack Developer & AI Engineer specializing in MERN applications integrated with AI/LLM backends. Proven expertise in real-time systems, agentic AI pipelines, and production-grade microservices architecture. 2nd Runner-Up at KIET Hackathon 2026. Skilled at delivering scalable applications with measurable business impact.

EDUCATION

Ajay Kumar Garg Engineering College, Ghaziabad Oct 2023 – Present
B.Tech in Computer Science **CGPA:** 8/10

PROFESSIONAL EXPERIENCE

Centre for Future Studies and Research Oct 2024 – Present
MERN Stack Developer

- Developed and deployed 3+ full-stack MERN applications; improved workflow efficiency by 30%.
- Designed 15+ REST APIs with Node.js and Express using modular MVC architecture for scalability.
- Built reusable React components with Redux state management; reduced development time by 40%.
- Optimized MongoDB queries using indexing and aggregation pipelines; improved performance by 50%.
- Implemented real-time data synchronization and improved data handling reliability by 25%.

FEATURED PROJECTS

Boardly: Real-time Collaborative Whiteboard **GitHub — Live Demo**

- **Tech Stack:** React, Redux, Node.js, Express, MongoDB, FastAPI, WebSockets.
- Built production-grade real-time whiteboard supporting 20+ concurrent users with sub-100ms synchronization latency.
- Integrated FastAPI microservice for intelligent AI features including shape recognition and smart suggestions.
- Implemented efficient message queuing, state persistence, and optimized database schemas for consistency.

AgriSense AI: AI-Powered Agriculture Platform **GitHub — Live Demo**

- **Tech Stack:** React, FastAPI, Ollama, Hugging Face LLMs, Regional Language APIs.
- Engineered multi-step agentic pipeline for context retrieval; achieved 90%+ accuracy on regional crop recommendations.
- Separated AI/business logic using decoupled microservices; optimized offline capabilities for rural deployment.
- **Award:** 2nd Runner-Up at KIET Hackathon 2026 (Top 2 among 50+ teams).

QuickCare AI: Medical Report Analysis System **GitHub — Live Demo**

- **System Workflow:** Document parsing → LLM summarization → structured insight extraction.
- Achieved 95%+ extraction accuracy using advanced NLP techniques and optimized prompt engineering.
- Reduced manual clinical review time by 60% through automated insight and structured summary generation.

Personal Portfolio & Project Showcase **Live Portfolio**

- **Tech Stack:** React, Tailwind CSS, Vercel, GitHub API.
- Designed and engineered a fully responsive, clean portfolio website from scratch to showcase production-grade projects.
- Integrated GitHub REST API to dynamically fetch repository metadata, commit histories, and deployment states.
- Optimized asset delivery and critical rendering path to achieve a near-perfect Google Lighthouse performance score.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, SQL

Frontend: React, Next.js, Redux, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, FastAPI, Django REST Framework

Real-time & Arch: WebSockets, Socket.io, Async/Await, Microservices, Event-driven Architecture

AI/ML: LLMs, LangChain, RAG, Ollama, Hugging Face, Prompt Engineering, Agentic Systems

Databases: MongoDB, PostgreSQL, Redis, Vector Databases

DevOps & Cloud: Docker, Git/GitHub, AWS EC2, Vercel, Render, Linux, CI/CD

ACHIEVEMENTS & RECOGNITION

- **2nd Runner-Up, KIET Hackathon 2026** – Top 2 team among 50+ teams for innovative AI platform solution.
- **Winner, Bug Sensing Competition, IMS** – Secured 1st place by identifying critical bugs and vulnerabilities in a targeted production website.
- **4th Position, CodeCrunch 2024** – Competitive programming achievement out of broad pool at AKGEC.
